

OMNIOUTLINER for Mac

What is OmniOutliner?

Compose. Arrange. Publish. OmniOutliner for Mac is a professional-grade outlining application to easily capture, compose, and organize text and data. It's feature-rich enough to see a novel from outline to print and simple enough to create a grocery list in a snap.

What makes OmniOutliner for Mac different?

OmniOutliner includes everything you'd expect in a premiere outlining application: fast, easy capture; intuitive editing; diverse templates; and robust styles. If you all you'd like to do with your outline is prepare a grocery list or balance your checkbook, OmniOutliner for Mac can help you do that. If you're looking for something a bit more complex, OmniOutliner is designed to expand organically with your needs. Advanced options are there when you need them, and stay out of your way when you don't.

One of the earliest and most iterated applications for OS X, its features employ native OS X technologies and do so well.

Who uses OmniOutliner?

Business professionals, writers, students, parents, home users, and educators all rely on OmniOutliner for its unparalleled document building functionality.

From complicated and intricate papers to a quick to-do list, some common-use examples include:

- Restructuring an essay on the fly
- Creating a number column to keep track of finances
- Adding "Buy milk" to a grocery list
- Using notes to expand on a principal idea
- Creating visual allure with styles
- Tapping checkboxes to keep track of completed agenda items

1

As soon as you launch OmniOutliner, a new document is created. Get right to work!

2

You can start putting together your rough outline by entering text, followed by the **Return** key.

Each line can also contain **Notes**: toggle the notes field with the Command-' shortcut.

4

If you need additional columns, tap **Add Column** in the toolbar. These columns can contain text, dates, numbers, checkboxes — you can even designate a column to display summaries of each parent's children rows.
